

# Karen's Sunshine Hand Sanitizer

Fast Acting Soft Gel & Liquid

Created with love and made from scratch - right here in Ohio. Karen's Sunshine has been creating healthy, happy hands since...well, a few months ago. We're new, and we're excited to share our products with you.

## Naturally clean. Scientifically safe.

Our clear gel and liquid spray hand sanitizer contain only the essentials. No additives. No chemicals. No dyes. Plus, they're vegan friendly and gentle on the skin. But they're also a powerful germ killer. We use Pharma Grade USP Isopropyl alcohol that's made to both FDA and CDC guidelines.

That means clean, moisturized, germ-free hands without that "sticky" residue other mass-market sanitizers leave.

## Naturally customizable

Karen's Sunshine has a soft, pleasant scent. But we can create custom scents. We can also create private labels and other packaging sizes to customize our products in any quantity. Whatever you need, we can help.

## Spread the word. Not the germs.

Karen's Sunshine is competitively priced, in stock and available right now in 2 oz and 4 oz sizes. We've already sold 250,000 units, so you can trust us to deliver quality and value along with safety and peace of mind.

## A Simple Act of Kindness

### The Story of Karen's Sunshine

When my mother, Karen, was diagnosed with ovarian cancer, our family and friends were devastated. Like all close-knit communities, everyone wanted to do something to help. We were gloriously inundated with prayers, cards, flowers, meals and words of encouragement. It was both comforting and beautifully overwhelming.

Along with the sea of moral support, my wife Cynthia brought a paper sunshine decoration to the hospital and hung it in Mom's room. My parents both enjoyed long vacations in Florida, so Cynthia thought the simple gesture of having a sun in her room would brighten her day. Mom always commented how much the little paper sun made her smile and always made a point to mention it to both visitors and staff.

Having the matriarch of the family in the hospital was emotionally devastating. Then came a global pandemic.

My business partner and I decided we had to do something - anything - to help. There was a shortage of hand sanitizer, so we stepped up.

Making hand sanitizer was a good fit for our company operations, and it was an opportunity for us to give back. All we needed was a brand.

All I could think about was that little paper sunshine hanging in Mom's hospital room, so we decided to call our product Karen's Sunshine. We also decided to honor her by donating a portion of sales to support cancer charities.

Today, Mom is recovering from surgery and feeling better - although she's a little embarrassed by all the attention she's getting with her name on a new product. But she's quietly proud of what she inspired.

Karen's Sunshine was born of necessity - to keep our friends and neighbors safe and healthy. But it was inspired by the love a mother has for her family. We all pray that Mom is able to enjoy some real sunshine very soon.

Stay safe,

Steve Satterthwaite
